

Technical Data Sheet (TDS)
CLEANING AND PRESERVATIVE EMULSION FOR STAINLESS STEEL

INOX CARE & POLISH

PRODUCT DESCRIPTION

Inox Care&Polish is an emulsion for cleaning, polishing, and maintaining stainless steel appliances and surfaces, safe for use on all metals, including brass, copper, and aluminum.

APPLICATION

- › For cleaning and maintaining matte, satin, and shiny surfaces made of stainless steel, chrome, brass, and aluminum;
- › Removes stubborn limescale deposits, grease, oil, dust, dirt and greasy fingerprints;
- › Antistatic protective coating prevents surface oxidation and corrosion;
- › Cleaning and protection of metal surfaces inside and out;
- › High material compatibility with additional protective effect;
- › Cleaning and protection of interior and exterior surfaces;
- › Recommended for balustrades, elevator cabins, window sills, door handles, landings, kitchen hoods, protective strips, interior fittings, and all stainless steel appliances, machines, and furniture.

PRODUCT PROPERTIES

- › Quick visual improvement of the surface appearance, refreshing the appearance of materials;
- › It does not cause scratches because it does not contain abrasive ingredients;
- › Antistatic effect;
- › Cleans even large surfaces without leaving any streaks;
- › Leaves a long-lasting, waterproof protective film;
- › Protects against re-soiling of the surface;
- › No silicone.

TECHNICAL PARAMETERS

State of matter	aerosol, liquid
Colour	milky
Smell	characteristic
Density	$0,8 \pm 0,05 \text{ g/cm}^3$
pH value	9

DELIVERY FORM | PACKAGE

Can, 400 ml

DIRECTIONS FOR USE

Before use, read the product label. Bring the can to room temperature and shake well. Stubborn stains, such as greasy deposits, should be removed in advance. Apply a thin layer to the surface to be cleaned and immediately spread with a dry, lint-free cloth and polish. For polished/satin-finished surfaces (hoods, dishwashers, elevators, etc.), always rub in the direction of the polish. Do not use on hot surfaces or work surfaces that come into direct contact with food. The product can also be applied to a cloth and wiped over the surfaces to be cleaned. Clean and remove with a degreaser. Do not use on live electrical equipment.

STORAGE AND EXPIRY DATE

The product should be stored in a closed container, upright, in a dry, cool, and well-ventilated place, away from direct sunlight and other sources of heat and ignition. Storage temperature: +5°C to +35°C (room temperature recommended). Expiration date: 2 years from the date of production. The production date is located on the bottom of the packaging.

With the publication of this data sheet, all previous editions become invalid. Release: 11.24

The product information contained in the technical data sheet is the result of conducted research. With regard to the possibility of using the product (point 3 of this technical data sheet), they should be treated only as recommendations resulting from the manufacturer's experience. Due to the numerous application possibilities and a wide range of work methods using the product, the Manufacturer does not bear any responsibility in this respect, and in particular is not responsible for the consequences of improper use of the product or the effects of work involving the product. Product information is valid only in its most current version.
